

Proposed items:

1. Requesting a meeting with the president regarding the allegations in the 2nd article on medium (see attached). Simply to ask if any of the accusations in the article are true.

2. Requesting an OMB audit of HU. The administration has suggested that university faculty are looking at firings. The administration has reduced benefits and there has been salary compression. Staff have been fired. How much of this has been impacted by corruption and theft?

3. Website and social media accounts for council and senate independent of administration. Release of statements regarding select topics approved by steering committee/council.

4. A letter to the board regarding the trustee election signed by supporters in the council (sending what went out over hucommunications with a brief cover )

5. A letter to the board from the FS steering committee reminding the board that they were alerted by the FS steering committee earlier in the year that a reason alums don't give back is because alums aren't sure where donated money goes. (Also that they may have been mistreated by the administration - for example not paid on time while students). In addition, according to president's statement, the board knew of the financial aid impropriety and firings, but didn't disclose it to students or the FS steering committee.

6. A letter to board and administration saying faculty will not stand for intimidation of student protestors. No turning off air conditioners and closing and locking bathroom facilities in the administration building during the protest. No Metropolitan Police Department or HU police on campus to remove students from the administration building.

7. No confidence vote in the executive committee of the board, president, and provost for upcoming full faculty senate.
