Dr. Alfred,

Good afternoon, I tried reaching you by phone earlier. Secondary to the confirmed case from Charter Day, and most recent updates from the CDC and Trump Administration, we want to move as many students away from campus as possible. The Housing office is communicating with international students one-on-one to determine what options are available to them including financial assistance from the University to support travel, other housing off campus, etc. We are also in communication with commercial housing vendors for students with the most challenging circumstances.

We are additionally concerned about significant disruptions in the supply chain to be able to feed and provide for a large number of students, should they remain on campus based upon communications with experts. I will receive an additional update from Housing later today. Thank you.

**Subject:** International Students and Dorms

Good afternoon,

I wanted to confirm. You all have decided that all students have to leave the dorms by March 22? This includes international students? I've two undergraduates in physics that are from Nepal and they have indicated they are being forced to leave the dorms. Also, what about students that have family that have tested positive? They are being forced out of the dorms as well?

Thank you,

Marcus Alfred
