Dr. Alfred,

Good afternoon. Regarding your previous inquiry, related to ques on #5, and #6, specifically, please find a response below;

5. Also, how many a ending physicians are at HU hospital now? How many have there been each year for the last 5 years?

As of March, 2020, there are 335 creden aled physicians at Howard University Hospital. This number has been fairly constant over the past 5 years.

6. How many of these attending physicians are African Americans? (both now and each of the last 5 years)

Howard University Hospital is a licensed Hospital of the District of Columbia. HUH has an open medical staff that accepts any qualified physician regardless of race, religion or orientation. The additional information that you request is protected by the medical staff bylaws and employment policies, and can not be provided without permission of those providers.

However, some of information you requested may be extracted from publicly available datasets at IPEDS below;

https://nces.ed.gov/ipeds/use-the-data

The Integrated Postsecondary Education Data System

The Integrated Postsecondary Education Data System (IPEDS), established as the core postsecondary education data collection program for NCES, is a system of surveys designed to collect data from all primary providers of postsecondary education. IPEDS is a single, comprehensive system designed to encompass all institutions and educational organizations whose primary purpose is to provide ...

Subject: Re: Demographics of Med school students at HU

Good evening. I am in receipt of your email and provide the table a ached in response to your inquiry regarding Howard University medical students. I will also respond on a ques on by ques on basis below:

1. How many of the 740 (first year med students and interns from last year) are med students and how many are interns?
Table 1 indicates that in 2019, there were 121 entering medical students in the M1 class.

2. How many HU med students are US citizens?

Table 1 indicates that in 2019, of the 121 medical students, 109 (90%) were US Citizens. For the five years between 2015-2019, 534 of 595 (89.9%) medical students were US Citizens.

3. How many HU med students are African Americans?

Table 1 indicates that in 2019, 89 of the 121 (73.6%) first year medical students self-identified as Black or African American (Category option as provided by AMCAS), the vast majority being US Citizens. For the five year period between 2015-2019, 407 of 595 (68.4%) of the first year medical students self-identified as Black or African American. (Please note that applicants to medical schools apply through a centralized process known as AMCAS <The American Medical College Application Service>, and respond to Race/Ethnicity on categories provided by AMCAS. Regarding Race/Ethnicity, AMCAS notes "AMCAS tables show counts of individuals who identified only as Black or African American ("Alone") as well as counts of individuals who identified as Black or African American and at least one other race/ethnicity category ("In Combination")."

4. For the last 5 years, how many HU med students have there been each year and how many each year have been US citizens? How many African American?

Table 1 indicates over the past five years, there have been 595 first year medical students. As noted previously, 407 have been Black/African American (68.4%), and 534 (89.9%) have been American Citizens. The breakdown by year is presented in Table 1 attached.

5. Also, how many attending physicians are at HU hospital now? How many have there been each year for the last 5 years?

I will need to obtain additional information from Human Resources to respond to this question.

6. How many of these attending physicians are African Americans? (both now and each of the last 5 years)

As noted above, I will need to obtain additional information from Human Resources to respond to this question.

Also, is it true that the decision to create a new Fine Arts College has been reversed?

The re-establishment of the College of Fine Arts has been postponed until next academic year (2021-2022), secondary to the negative financial impact of COVID-19. Given the pro-rated room and board, and fee refunds to students, lower anticipated revenues secondary to the pandemic, as well as additional costs anticipated to nearly triple the available beds in the hospital, it would not be prudent to re-establish the College in this challenging fiscal environment.

Thank you.

Subject: Demographics of Med school students at HU

Good morning Dr. Wutoh,

About a year ago, I'd asked Dean Mighty about 3 different mes for the following informa on but he never provided it. It's relevant to recruitment of undergrads that might eventually want to go to med school.

1. How many of the 740 (first year med students and interns from last year) are med students and how many are interns?
2. How many HU med students are US citizens?
3. How many HU med students are African Americans?
4. For the last 5 years, how many HU med students have there been each year and how many each year have been US citizens? How many African American?
5. Also, how many attending physicians are at HU hospital now? How many have there been each year for the last 5 years?
6. How many of these attending physicians are African Americans? (both now and each of the last 5 years)

Also, is it true that the decision to create a new Fine Arts College has been reversed?

Thank you,
