Good evening Dr. Wutoh,

The senate would like the HU administration to make available all information and answer the questions of Profs. Burge, Washington, Li, and Rawat regarding the ransomware attack for the duration of the crisis and its aftermath.

Thank you,

Marcus Alfred

Dr. Alfred,

Good evening. I wanted to follow up on several items raised during our update meeting yesterday, particularly focused on COVID-19 items;

a. Student with symptoms who has not received a test result. If a student, or faculty member has symptoms, they should not present to class or work. If the student was tested, and has not received a result within 24 hours, they should contact Student Health (202-806-7540). Student Health can perform a rapid test and provide results within 15 minutes, as well as support for the student.

b. Faculty member was tested last week, but has not received a result yet. I am following up with the lab to identify the turnaround time, and why there would possibly be samples received, but a result not provided. In any case, Dr. Roger Mitchell, Chair of the Department of Pathology, is overseeing this process, and has indicated that the faculty member may contact him directly to identify the test results. His email address is [roger.mitchell@howard.edu](mailto:roger.mitchell@howard.edu).

c. Implementation of a schedule for testing of all faculty and staff on a weekly basis. We have implemented this for students, and will be following suit for faculty and staff as well so that all faculty and staff will begin receiving emails invitations to test on specific days.

d. Is it possible when we report results whether it can be further defined by the location of the positive tests (perhaps by school or building)? We can identify students/employees by school, and residential students by dorm. I will discuss further if/how this could be incorporated into the dashboard.

Thank you.
